GEC JOURNAL OF SCIENCE & TECHNOLOGY

INDEX TO VOLUME 45, 1978-9

THE GENERAL ELECTRIC COMPANY LIMITED

INDEX

VOLUME 45, 1978-9

Inclusive page numbers for the year's issues are:

No. 1	1 to 48
No. 2	49 to 96
No. 3	97 to 144

PAGE

A

Arc interruption in SF_6 circuit breakers—Research studies of....21

B

Bearings—MELBA: a suite of computer programs for analysis of self-acting plain....83

C

Calculation of the sparkless zone of d.c. machines....27
Ceramics for the electrical industry—New developments in glasses and....11
Circuit breakers—Research studies of arc interruption in SF_6....21
Compensators—Static reactive, for a.c. power transmission: ten years' operational experience with saturated reactors....99
Computer programs for analysis of self-acting bearings—MELBA: a suite of....83
Concrete—Electrically conductive....45

D

Damage in optical materials at 1·06 μm—Laser....109
Design parameters on the sparkless zones of d.c. machines—The influence of....51
Diesel engines—Turbocharging air-cooled....56
Digital services to the telephone subscriber—Extending....78
Direct currents—Liquid-metal switching of ultra high: a new approach....63
Drives—Steam turbines for industrial mechanical....3
Dynamic positioning system for a semi-submersible vessel—Simulation of a....135

E

Electrically conductive concrete....45
Engines—Turbocharging air-cooled diesel....56
Extending digital services to the telephone subscriber....78

PAGE

F

Fault-tolerant multimicroprocessor for telecommunications and general applications—A....116

G

Glass-ceramics in radome applications....71
Glasses and ceramics for the electrical industry—New developments in....11

I

Industrial mechanical drives—Steam turbines for....3
Influence of design parameters on the sparkless zones of d.c. machines—The....51

L

LANDFALL: a high-resolution automatic vehicle-location system....34
Laser damage in optical materials at 1·06 μm....109
Liquid-metal switching of ultra-high direct currents: a new approach....63
LLTV systems—Mathematical modelling of active and passive....91

M

Machines—Calculation of the sparkless zone of d.c....27
Machines—The influence of design parameters on the sparkless zones of d.c....51
MARCUS 16: a microprocessor approach to process-control systems....129
Mathematical modelling of active and passive LLTV systems....91
MELBA: a suite of computer programs for analysis of self-acting plain bearings....83
Multimicroprocessor for telecommunications and general applications—A fault-tolerant....116

N

New developments in glasses and ceramics for the electrical industry....11

PAGE

O

Optical materials at 1·06 μm—Laser damage in 109

P

Positioning system for a semi-submersible vessel—Simulation of a dynamic 135
Process-control systems—MARCUS 16: a microprocessor approach to 129
Processing of synthetic aperture radar from a satellite 123

R

Radome applications—Glass-ceramics in 71
Research studies of arc interruption in SF_6 circuit breakers 21

S

Simulation of a dynamic positioning system for a semi-submersible vessel 135
Sparkless zone of d.c. machines—Calculation of the 27
Sparkless zones of d.c. machines—The influence of design parameters on the 51
Static reactive compensators for a.c. power transmission: ten years' operational experience with saturated reactors 99
Steam turbines for industrial mechanical drives 3
Switching of ultra-high direct currents—Liquid-metal: a new approach 63
Synopses 2, 50, 98
Synthetic aperture radar from a satellite—Processing of 123

T

Technical literature 48, 96, 144
Telecommunications and general applications—A fault-tolerant multimicroprocessor for 116
Telephone subscriber—Extending digital services to the 78
Transmission—Static reactive compensators for a.c. power: ten years' operational experience with saturated reactors 99
Turbocharging air-cooled diesel engines 56

V

Vehicle-location system—LANDFALL: a high-resolution automatic 34
